

84 : 3 = 28

The diagram illustrates the division of 84 by 3 using base ten blocks. The dividend 84 is represented by 8 tens rods and 4 ones units. The divisor 3 is represented by 3 ones units. The quotient 28 is shown as 2 tens rods and 8 ones units. The process involves dividing the tens into groups of 3, with a remainder of 2 tens, which are then converted to 20 ones and added to the original 4 ones to make 24 ones, which are then divided by 3 to get 8 ones.
